

The product portfolio

ZG2

ZG all-in-one

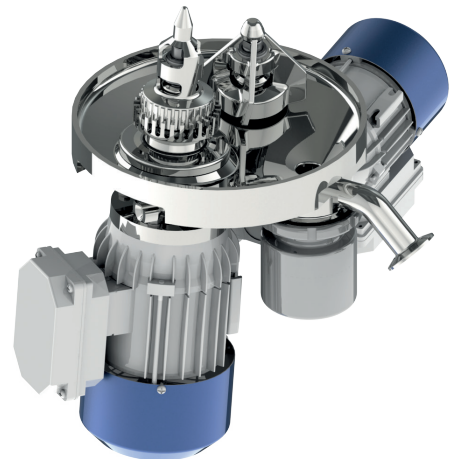

Integrate the high efficiency mixing performance of the ZG platform into the a single dish free of welding with high aseptic design and optimal location of the mixer for best result.

ZG2 & Flange

Combinating two applications

By combining the high shear or high power with the ZG platforms, a multifunction system is achieved. This products allows to combine high shear applications with normal mixing.

Flange

Offers flexibility between platforms

The flange version provides a flexible solution for the medium and high shear applications and accomodates both the high shear and high power platforms.

Truelev

Low shear premium innovation

The astonishing truelev mixer provides a completely unique performance perfect for your low shear application. The mixing system can be run on minimal volumes, ensuring minimal product loss.
